SUBLI BLOCK-PU

Block Out dye migration
Light weight and good elasticity
No curling when cut to smaller sheets

Subli-block PU makes the ultimate barrier to sublimation dyed textiles. The additional layer of the flex can protect the color migration activated by the sublimation ink of the textiles so you can feel the original flex color on the garment. You can see the difference when you heat press the flex on colorful garment.

SILICONE FLEX

Thick flex with subli block properties

Friendly environmental PU

200mic & 500mic

The ultimate in heat transfer flex - Silicone flex is available in 200 & 500 micron versions. Silicone Flex is color rich, with great stretch & rebound properties. Having natural dye sub block out properties, it's perfect for sporting and fashion garment decorators alike. The ultra-luxurious touch will take garment designs to the next level, enabling decorators to command a higher price for their designs.

CARBON PU

Carbon fiber texture
Striking visual effect
Sophisticated brushed metal

Carbon fiber vinyl is widely used on Vehicles wrap, Furniture, Laptop, Cell phones and so on. But from now on, you can decorate your T-shirts with AW Carbon PU which creates carbon fiber patterns, sophisticated brushed metal and striking visual effect. It is thicker than normal PU but it is stretchable and heat resistant so the carbon pattern is remains clear after heat pressing. Also, a clear, light adhesive backing enables intricate cutting and registration.

Available Roll Sizes

Width: 19.6 inch

PUFF PU

Three-dimensional and voluminous designs
Soft and warm texture

Puff PU is a foaming vinyl that makes a self-expansion by heat pressing. If you would like to make your design to be three-dimensional and voluminous, try our Puff PU!

It looks like normal PU but it expands under a single press creating cubic, 3D effects compared with normal film. In addition, it provides soft and warm texture on your design.

A clear, light adhesive backing enables intricate cutting and registration.

Available Roll Sizes

Width: 19.6 inch
 Length: 1968.5 inch
 MOQ: 7874.02 inch / color

**Full Color Sublimation Printing
Onto woven surface**

Subli Fabric is an innovative HTV that allows you to use sublimation paper on fabrics with various colors. It feels a lot like normal t-shirt so it enables you to add full color designs onto dark colored fabrics without altering the texture of the t-shirts. It has a soft texture which makes it suitable to create unique designs without stiff texture. Since it is soft and comfortable, it is perfect for casual wear, sportswear and any other informal occasions. Because it is compatible with sublimation printing, you do not have to worry about color fading after wash.
